## FM4310 Tracker

The FM4310 is a compact and cost-effective tracker featuring GPS, GPRS, and LTE Cat-M1 technologies. It offers versatile options, including ultra-low-cost, RS232, 1-Wire, and support for external devices.

**\*3 days:  
minimum 30min  
reporting in deep  
sleep mode.**

### Event Detection

The FM4310 accurately detects critical driving incidents and provides real-time alerts, detailed event data, and advanced analytics for driver coaching.

### Driver Behavior Analysis

FM4310 Tracker provides comprehensive insights into driver behavior, including speeding, harsh braking, hard turns, and aggressive acceleration.

## FEATURES

LTE Cat M1/NB-IoT, 2G

Waterproof IP67 Compliant

Identify Virtual Ignition  
(Voltage/Motion)

Geo-fences (Circular/Polygonal)

Maintenance Server Supported

DPA (Driving Pattern Analysis) /  
CR (Crash Reconstruction)\*  
Optional

Jamming Detection (Optional)

Built-in 3-axis Accelerometer

**Geofence**  
(Circular/Polygonal)

**Power Supply**  
DC 8 V ~ 33 V, Main power +/-  
inversion protection

**Waterproof**  
IP67 Compliant

# Your Reliable Fleet Management Solution

## Improving Driver Behavior with FM4310.

### Motion Detection

Built-in 3-axis accelerometer

FM4310 improves driver behavior through real-time alerts, detailed event data, and coaching based on advanced analytics.

### Configurable/Customized Reports

Configurable report format, easily preconfigure for report mode, various report based on driving mode and condition
