## FM4500 Tracker

The FM4500 is a cost-effective vehicle tracker that supports 4G LTE Cat-M1/NB-IoT with fall back to 2G. Simply plug it into the vehicle's OBDII port for tracking, monitoring diagnostic information, and easy installation.

The FM4500 features a **built-in 3-axis accelerometer** for enhanced functionality.

### Event Detection

The FM4500 accurately detects critical driving incidents and provides real-time alerts, detailed event data, and advanced analytics for driver coaching.

### Driver Behavior Analysis

FM4500 Tracker provides comprehensive insights into driver behavior, including speeding, harsh braking, hard turns, and aggressive acceleration.

## FEATURES

Network: LTE Cat M1/NB-IoT

Bluetooth communication  
(Optional)

Interaction with smartphone  
(Optional)

Reading variable vehicle data  
with OBDII protocol

Configurable Report Format

Multiple Report Mode Condition

DPA (Driving pattern analysis)

CR (Crash reconstruction)

Maintenance Server Supported

**Geofence**  
(Circular/Polygonal)

**Power Supply**  
DC 8 V ~ 30 V

**Operating Temp**  
-40oC ~ +85oC

# Your Reliable Fleet Management Solution

## Motion Detection

Built-in 3-axis accelerometer

## Configurable/Customized Reports

Configurable report format, easily preconfigure for report mode, various report based on driving mode and condition

## Improving Driver Behavior with FM4500.

The FM4500 tracker improves driver behavior through real-time alerts, vehicle diagnostics monitoring, and valuable insights from its 3-axis accelerometer, promoting safer driving habits.
